

Immune System Support*

Quantum Colostrum

World-Class Immune System Support*

Available in capsules
or as powder

Reliable Immune Support
for the whole family*

What is Colostrum?

Colostrum is a special fluid secreted by a mother for about 3 days after giving birth. It is rich in protective life-giving factors, including multiple immune system support*

The Best Colostrum

- 100% Pure Whole Colostrum
Not defatted which compromises its intracellular transport
- From Organically Fed, Happy Cows
Not from commercial cows treated with drugs and synthetic hormones
- Low Temperature, Air-Dried
Not freeze-dried or highly heated
- Free of synthetic hormones and toxic chemicals
No synthetic hormones, antibiotic residues or other drugs

- **Broad-spectrum immune system support***
Contains human-active immunoglobulins with a whopping 21% minimum immunoglobulins (IgG and IgA)
- **The richest source of natural MSM**
MSM is a sulfur compound which helps promote a strong and healthy immune system*
- **Rich in Lactoferrin (6 mg/gram)**
Lactoferrin is a natural compound which helps to promote healthy oxygen transport in the blood
- **Powerful, Immune-Boosting Compounds**
Contains human-active Immunoglobulins (IgG, IgM, IgA), lactoferrin, PRP (proline-rich polypeptide),

glycoproteins, interferon, oligosaccharides, enzymes (including lysozyme and peroxidase), cytokines, probiotic bacteria (*Lactobacillus Bifidus*), transfer factor and multiple growth factors (somatomedin, somatotropin, transforming growth factor, etc.)

- **Rich in the Elusive N-Acetylneurameric Acid (NAA)**
Colostrum is the only known food source of NAA, one of the 8 healing sugars, necessary for optimal human physiology and growth. Although NAA is made by the body, levels decline with age and stress, leaving most people deficient. NAA promotes brain development, learning, memory and enhanced performance. NAA is an immune modulator and promotes healthy cholesterol within the normal range*

Quantum Colostrum

The Finest Quality "Beyond Organic" Colostrum
To Promote and Maintain A Strong, Healthy Immune System*

What's The Difference?

Ours	The Other Guys
1. Low-Temperature Air-Drying Our colostrum is carefully air-dried at low temperature to ensure full activity of all the colostrum's immune-enhancing factors.*	1. Other products may contain colostrum which has been highly heated, defatted, hydrogenated or taken from sick or commercially fed cows. Inferior colostrum has poor biological activity.
2. Guaranteed Immunoglobulin Levels Our certificate of Analysis guarantees that our product contains a whopping 21% IgG (immunoglobulins).*	2. Other products may contain much less IgG or IgG damaged from poor processing.
3. "Beyond Organic" Colostrum Our colostrum is from only organically fed, happy cows that have never been ill. They receive no hormones, antibiotics or other drugs. Rarely, if a cow does fall ill, it is never again used to supply colostrum. Super healthy cows provide quality colostrum which is superior in all its active factors.	3. Other products may contain colostrum from cows that have been fed commercially (with toxic or pesticided feed), subjected to drugs (such as growth hormones or antibiotics), or were sick during the colostrum collection. Sick cows provide poor quality or even toxic colostrum.
4. No Binders, Fillers or Glues Our colostrum capsules contain 100% pure colostrum powder with absolutely NO binders, fillers or glues. We also offer our colostrum in bulk powder so it is easy to scoop into your favorite health shake.	4. Other products may contain colostrum with undisclosed fillers or binders. Avoid colostrum in tablet form. Tablets are typically made with high pressure and heat which degrade the ingredients.
5. 100% Pure Vegetable Capsules We use only 100% pure vegetable capsules, not gelatin (beef) capsules, so there is no fear of consuming deadly prions (viral particles), which can cause infection.	5. Other products may use gelatin capsules, typically made from commercial beef hooves, which may carry the risk of prion infection.

Quantum Colostrum Powder (5 oz/bottle): Ingredients

100% Whole Colostrum, pesticide-free, not defatted, contains min. 21-25% IgG
Other Ingredients: Vegetable cellulose capsule

Guaranteed free of: magnesium stearate (a toxic excipient), corn, soy, salt, sugar, wheat, yeast, artificial colors, flavors or preservatives. Store in a cool, dry place.

Violite™ Protected: Patent-pending dark violet bottle proven to block damaging light

Recommended Use. Adults or children (from birth and up): Take 1 teaspoon, 1 to 2 times daily. May be mixed in food or drinks. For special programs, up to 4 tablespoons may be taken daily.

Quantum Colostrum (445 mg/Vcap, 60 Vcaps): Ingredients

100% Whole Colostrum (pesticide-free, not defatted, contains min. 21-25% IgG), Stabilized Rice Protein

Guaranteed free of: magnesium stearate (a toxic excipient), corn, soy, salt, sugar, wheat, yeast, artificial colors, flavors or preservatives. Store in a cool, dry place.

Violite™ Protected: Patent-pending dark violet bottle proven to block damaging light

Recommended Use. Adults or children (age 4 and up): Take 1 capsule, 1-3 times daily. For special routines, up to 12 capsules daily may be taken.

Vegetable Capsules: The Superior Choice

Magnificent Mr. Capsule

- Nutrients retained in their original form
- Easy to absorb
- No damaging heat or pressure
- No degrading of nutrients
- No rancid oil by-products
- 50% better absorption than tablets
- Easily breaks down in stomach
- No toxic glues, binders, lubricants

Miserable Mr. Tablet

- Up to 20,000 lbs. per sq. inch is used to smash ingredients into a tablet
- Creates damaging heat and pressure
- Can degrade nutrients up to 25%
- Often creates rancid by-products
- 50% poorer absorption than capsules
- Often seen whole in the toilet
- Liver-toxic glues, binders and lubricants -- usually not listed on the label

Vegetable Capsules Vs. Gelatin Capsules

We use 100% pure, preservative-free vegetable capsules which dissolve rapidly, regardless of the food temperature, unlike gelatin capsules which are hard to digest, temperature-sensitive, contain toxic preservatives and carry the risk of "mad cow" prion exposure.
